Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities all the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

Manuscripts must contain a statement to the effect that all human studies have been reviewed by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in an appropriate version of the 1964 Declaration of Helsinki. It should also be stated clearly in the text that all persons gave their informed consent prior to their inclusion in the study. Details that might disclose the identity of the subjects under study should be omitted.

Reports of animal experiments must state that the "Principles of laboratory animal care" (NIH publication No. 85-23, revised 1985) were followed, as well as specific national laws (e.g. the current version of the German Law on the Protection of Animals) where applicable.

The managing editors reserve the right to reject manuscript that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or for failure to fulfill the above-mentioned requirements.

All articles published in this journal are protected by copyright, which covers the exclusive right to reproduce and distribute the article (e.g., as offprints), all translation rights as well as the rights to publish the article in any electronic form. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-1200, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for an copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A 0S2, Canada (Tel: 613-993-9251; Fax: 613-952-8243; e-mail: cisti.docdel@nrc.ca).

Contents of Volume 80

- Abraham LD → Gonzalez RV
Abramovich-Sivan S, Akselrod S:
Simulation of atrial activity by a phase response curve based model of a two-dimensional pacemaker cells array: the transition from a normal activation pattern to atrial fibrillation 141
Adelsberger-Mangan DM → Levy WB
Akselrod S → Abramovich-Sivan S
Anton JL → Koechlin E
Arnoldi HMR, Englmeier K-H, Brauer W:
Translation-invariant pattern recognition based on Synfire chains 433
Av-Ron E, Vidal P-P: Intrinsic membrane properties and dynamics of medial vestibular neurons: a simulation 383
- Barr RE → Gonzalez RV
Baxter DA → Canavier CC
Bertulis A → Bulatov A
Bock O → Wenderoth N
Bock O, Wenderoth N: Dependence of peripheral tremor on mechanical perturbations: a modeling study 103
Bootsma RJ → Mottet D
Brauer W → Arnoldi HMR
Brown D → Feng J
Buchanan TS → Gonzalez RV
Bulatov A, Bertulis A: Distortions of length perception 185
Burnod Y → Koechlin E
Butera RJ → Dror RO
Byrne JH → Dror RO
Byrne JH → Canavier CC
- Canavier CC → Dror RO
Canavier CC, Baxter DA, Clark JW, Byrne JH: Control of multistability in ring circuits of oscillators 87
Capurro A, Pakdaman K, Perrone R, Macadar O: Analysis of the jamming avoidance response in the electric fish *Gymnotus carapo* 269
Cerf R, El Amri M, El Ouasdad EH, Hirsch E: Non-linear analysis of epileptic seizures I. Correlation-dimension measurements for absence epilepsy and near-periodic signals 247
Clark JW → Canavier CC
Clark JW → Dror RO
- de Oliveira CRE → Pain CC
Delic H → Levy WB
Dicke PW, Thier P: The role of cortical area MST in a model of combined smooth eye-head pursuit 71
Domen K, Latash ML, Zatsiorsky VM: Reconstruction of equilibrium trajectories during whole-body movements 195
Dror RO, Canavier CC, Butera RJ, Clark JW, Byrne JH: A mathematical criterion based on phase response curves for stability in a ring of coupled oscillators 11
- Egelhaaf M → Zanker JM
El Amri M → Cerf R
El Ouasdad EH → Cerf R
Englmeier K-H → Arnoldi HMR
- Farrar DS, Zipser D: Neural network models of bilateral coordination 215
Feng J, Brown D: Coefficient of variation of interspike intervals greater than 0.5. How and when? 291
Fitzurka MA, Tam DC: A joint interspike interval difference stochastic spike train analysis: detecting local trends in the temporal firing patterns of single neurons 309
- Gabriel J-P → Studer LM
Goddard AJH → Pain CC
Gonzalez RV, Abraham LD, Barr RE, Buchanan TS: Muscle activity in rapid multi-degree-of-freedom elbow movements: solutions from a musculoskeletal model 357
Grootenboer H → van der Kooij H
Guo A → Wu Z
- Hirsch E → Cerf R
Honda M → Okadome T
Hori S, Yamaguchi Y, Shimizu H: Self-organization of the heartbeat as coordination among ventricular myocardial cells through mechano-electrical feedback 1
- Jacobs R → van der Kooij H
Jimbo Y → Tateno T
- Kirsch RF → Perreault EJ
Koechlin E, Anton JL, Burnod Y: Bayesian inference in populations of cortical neurons: a model of motion integration and segmentation in area MT 25
Koopman B → van der Kooij H
Kosha M → Sanner RM
- Latash ML → Domen K
Levy WB, Delic H, Adelsberger-Mangan DM: The statistical relationship between connectivity and neural activity in fractionally connected feed-forward networks 131
- Macadar O → Capurro A
Maria Acosta A → Perreault EJ
Mon-Williams M, Tresilian JR: 155
Mori S → Wong W
Mottet D, Bootsma RJ: The dynamics of goal-directed rhythmical aiming 235
- Nicolai J → Stam CJ
- Okadome T, Honda M: Kinematic construction of the trajectory of sequential arm movements 157
- Pain CC, de Oliveira CRE, Goddard AJH, Umpleby AP: K-way neural network graph partitioning with separator vertices 227
Pakdaman K → Capurro A
Perreault EJ, Kirsch RF, Maria Acosta A: Multiple-input, multiple-output system identification for characterization of limb stiffness dynamics 327
Perrone R → Capurro A
- Rabbitt RD: Directional coding of three-dimensional movements by the vestibular semicircular canals 417
Ruegg DG → Studer LM
- Sabatini SP, Solari F: An architectural hypothesis for direction selectivity in the visual cortex: the role of spatially asymmetric intracortical inhibition 171
Sanner RM, Kosha M: A mathematical model of the adaptive control of human arm motions 369
Schwartz EL → Yeshurun Y
Shimizu H → Hori S
Solari F → Sabatini SP
Srinivasan M → Zanker JM
Stam CJ, Vliegen JHR, Nicolai J: Investigation of the dynamics underlying periodic complexes in the EEG 57
Studer LM, Ruegg DG, Gabriel J-P: A model for steady isometric muscle activation 339
- Tam DC → Fitzurka MA
Tateno T, Jimbo Y: Activity-dependent enhancement in the reliability of correlated spike timings in cultured cortical neurons 45
Taylor JG: Neural 'bubble' dynamics in two dimensions: foundations 393
Thier P → Dicke PW
Tikkanen PE: Nonlinear wavelet and wavelet packet denoising of electrocardiogram signal 259
Tresilian JR → Mon-Williams M
- Umpleby AP → Pain CC
Ur H → Yom-Tov E
- van der Kooij H, Jacobs R, Koopman B, Grootenboer H: A multisensory integration model of human stance control 299
Vidal P-P → Av-Ron E
Vliegen JHR → Stam CJ
- Wang X: Three-dimensional kinematic analysis of influence of hand orientation and joint limits on the control of arm postures and movements 449
Wenderoth N → Bock O

- Wenderoth N, Bock O: Load dependence of simulated central tremor 285
- Wong W, Mori S: A conceptual approach to the magical number 7 85
- Wu Z, Guo A: Selective visual attention in a neurocomputational model of phase oscillators 205
- Yamaguchi Y → Hori S
- Yeshurun Y, Schwartz EL: Cortical hypercolumn size determines stereo fusion limits 117
- Yom-Tov E, Yom-Tov S, Ur H: A model of induced coupled movements in the human body: a case study 411
- Yom-Tov S → Yom-Tov E
- Zanker JM, Srinivasan M, Egelhaaf M: Speed tuning in elementary motion detectors of the correlation type 109
- Zatsiorsky VM → Domen K
- Zipser D → Farrar DS
